

FOR IMMEDIATE RELEASE

### **Qual-Pro achieves recertification to new ISO quality standard**

**LOS ANGELES, CA – February 15, 2010** – Qual-Pro Corporation, an industry leading electronics manufacturing service provider for high-reliability, mission-critical electronics, today announced that the company was awarded recertification to the updated ISO 9001:2008 quality system. This certification of its quality management system provides evidence of the company's commitment to reliability and quality in its manufacturing, engineering and procurement processes. Qual-Pro has held its ISO 9001 certification for 10 years.

The ISO 9001:2008 standard specifies quality management system requirements that allow an organization to consistently meet customer requirements and increase customer satisfaction through continuous improvement. During the certification process, Qual-Pro was required to provide proof it had implemented the necessary procedures to improve product and service quality on a regular, quantifiable and verifiable basis, while following a systematic approach to overall quality management.

"The ISO certification was received after a detailed audit by DQS-UL", stated Chief Operating Officer, Rich Fitzgerald. "This further reinforces our team's commitment to providing our customers with the most reliable and highest quality products and services."

For a copy of the certificate, see the company's site: <http://www.qual-pro.com/AboutUs.html>

#### **About Qual-Pro**

Qual-Pro is an electronics manufacturing service provider certified to AS9100 (aerospace devices), ISO 9001 and ISO 13485 (medical devices) quality standards. The company's range of expertise encompasses complex Printed Circuit Board (PCB) assemblies and full-box builds. To more than 200 customers, Qual-Pro has offered the complete range of electronics manufacturing services including turnkey system assembly, flex assemblies, BGA and micro-BGA placements, functional and in-circuit testing (ICT), electro-mechanical assembly and design for manufacturability (DFM) services. Qual-Pro specializes in high-mix, low-to-medium volume assemblies, quick-turn prototypes and new product introduction (NPI) services. They provide complete manufacturing engineering and integrated supply chain services to all their customers. Qual-Pro builds products in its 55,000 square foot state of the art manufacturing facility in Gardena, California.
